

Please do not do anything to lessen what we now have with the Indiana Telephone Privacy Act. It has done wonders to almost totally stop the telemarketing calls. I used to get several calls a day & now can go days without getting a single one! Do wish they would stop the politicians too! The 2 politicians who called me with "canned" messages asking me to vote for them this year lost my vote. I don't care to have dinner interrupted by them either! There's nothing worse than running to catch the telephone & finding a telemarketeer. I don't like my life being invaded. I have rights, too, not just their rights. I will not be nice to anyone calling here unsolicited.
